Profile

I am hardworking and always willing to learn new things and technology. Right now I am good in skills like Javascript, HTML, CSS, React js, and React Native, and I also have knowledge of Node js, Express Js, and MongoDB for the backend. I am able to create dynamic complex web apps using these skills. I have knowledge of Agile methodology with Scrum framework. Always ready to accept challenges and give my best to achieve my goal.

Skills

Javascript, HTML, CSS, React JS, Node Js, Express Js, MongoDB, Python, TypeScript, Java, Next.Js, SQL, Hapi.js, Objection.js, Knex, PostgreSQL, Angular, React Native, GraphQL, Tanstack Query, YAML, Flux, Redux/Redux-toolkit, AWS, Agile Methodology (Scrum Framework), Jira

Interests

Coding (I like to code when I get the time and try to make something creative.),
Watching Movies (To relax my mind sometimes I love to watch movies.),
Travelling (I like to explore new places whenever I get the chance.)

Education

B.E, Dr. APJ Abdul Kalam University, Indore, Madhya Pradesh

2017 – 2021 | Indore, India

I have completed my Bachelor of Engineering in Computer Science.

Projects

Movie Sphere ✍

Jun 2023 – Jun 2023

I created this OTT website by taking reference of Netflix in terms of designs. The tech stack used in this project are: React, Redux-toolkit, Firebase, React-icons, Styled-components, Axios. Basic signup and login functionality with Firebase and fetching movie genres and data from tmdb API.

Hosted link: <https://moviesphere.netlify.app/>

E-Commerce Site, MERN Project ✍

Feb 2023 – Feb 2023

Created a functional E-Commerce site in React with MongoDB as the database and Node.js/Express.js for the backend. Additional libraries used include Bcrypt, JWT, Binary-tree, and React-hot-toast. Admin users can add new products and categories, while also updating user order status.

Github repo: <https://github.com/Ravi140891/e-commerce.git>

Hosted link: <https://fine-gray-antelope-vest.cyclic.app/>

Portfolio Site ✍

Mar 2023 – Mar 2023

Created this simple Portfolio site of my own in React and used Tailwind CSS as a framework.

Professional Experience

Full Stack Developer, Navgurukul

Apr 2023 – present

Currently, working as an Intern at Navgurukul as a Full Stack Developer, I have been exposed to a wide range of technologies including React, Hapi.js, Objection.js, Knex, and PostgreSQL. My primary responsibilities involve the development of software applications, as well as maintenance and support tasks. The experience has been truly rewarding, as I have had the opportunity to learn from experienced professionals in the industry and contribute to the team in meaningful ways. Navgurukul provides a dynamic work environment, where I am able to gain valuable hands-on experience, build my skills, and grow professionally. I am honored to be part of such an innovative and progressive organization, and I am excited to leverage the skills and experience I have gained at Navgurukul to make meaningful contributions to the team of my next employer.

Languages

Job Search App

Mar 2023 – Mar 2023

Created this Android app in React Native using Expo. It shows job posts as per the keyword search and show data by fetching from API.

Github Repo: <https://github.com/Ravi140891/Job-Search-App>

Tour & Travels Dummy

Mar 2023 – Mar 2023

This is a dummy template of the Tour and Travels site. Designed with just HTML and CSS.

Git repo: <https://github.com/Ravi140891/Tour-Travels.git>

Hosted Link: ravip-tour-travel-design.netlify.app

Chat App

Feb 2023 – Feb 2023

I created this amazing chat app in React and used Firebase as a backend for it. We can have real-time chats with anyone in this world. Also, users can send images to each other. To initiate a chat with anyone we have to add the user by his user id then we can start chatting. Users can upload their profile pictures. It's a simple but good chatting app.

git repo: <https://github.com/Ravi140891/react-chat.git>

AI GPT

Mar 2023 – Mar 2023

Created a clone of chat GPT in React with the backend as well. Using OpenAi API to get results from chat GPT.

Git Repo: <https://github.com/Ravi140891/chat-gpt-clone.git>

Hosted Link: <https://crowded-plum-pig.cyclic.app>

Discord Clone

Dec 2022 – Dec 2022

I tried to create a clone of the Discord app in which users can create a new server and a new channel. Also able to chat with other users.
