PROFILE

I am a software engineer with 2 year experience working on complex software development initiatives. Proficient in building robust and scalable front-end solutions using React and related technologies. Experienced in collaborating with cross-functional teams to deliver high-quality software products. Committed to staying updated with the latest trends and best practices in React development. Seeking a challenging role to leverage my expertise and contribute to the success of innovative projects.

WORK EXPERIENCE

Assistant Developer

Kuruvila Technologies Private Ltd

2021-2023

Bills Pe:-Large corporations with distributed offices face a challenge when it comes to paying utility bills for their regional offices. The current process involves scanning and processing each individual bill for each office, which can be time-consuming and prone to errors. Additionally, it can lead to delayed payments and late fees, which can negatively impact the company's finances.To develop a single platform that can be used by the head office to pay all utility bills for its subordinate offices. This platform would allow the company to pay bills across categories such as electricity, water, and others in one go, making the process more efficient and streamlined.The Utility Bill Payment System will be used by corporations with distributed offices to pay utility bills across categories such as electricity, water, and others for all their offices. The system will facilitate the payment of bulk utility bills and enable the head office to pay all bills in one go, eliminating the need to scan and process each individual bill.

Assistant Developer

Kuruvila Technologies Private Limited

2021-2023

StorePe:-StorePe is a digital ledger or accounting app that helps small businesses and merchants in managing their financial transactions and recording their day-to-day expenses and incomes. It is specifically designed to cater to the needs of small and medium-sized enterprises (SMEs) in emerging markets.StorePe serves as a digital replacement for traditional paper-based ledger books. It allows users to record and track their business transactions digitally, providing a clear and organized view of their financial records.
