Responsible Frontend Developer, passionate about delivering outstanding quality and service. Over a period of time, I have acquired relevant skills and experience, which I shall bring to your organization. I have also worked on my communication abilities and teamwork skills, which I will put to use in my future career, which would be in your organization if I am selected for the position. I will give my 100% effort to your organization, I am a self-motivated person with high-quality work in development. Being a fast learner, I quickly pick up technology related to my project. If I channel them further, they will bring fruitful results to me and your organization.

## Education

**Bachelor of Science in Computer Science**      SIES college of science at Nerul, Navi Mumbai  
Aug 2019 - June 2022  
• **CGPS: 8.96**

## Key Skills

- JavaScript, React, HTML, CSS, TailwindCSS, Figma, GitHub

## Learning About Development

- In 2020, I started learning web development. I started it with HTML and CSS. After that, I build a website for the Pomodoro counter to gain some experience.
- I found out this is the basics of web development the real game is JavaScript. So, I started JavaScript to get some deep development knowledge.
- After that, I build a website called Pig-Game with help of course. I posted that website on my GitHub.
- I build a website called power index. This website helps users to check countries' power depending on the country's Army, Navy, and Air force.
- The power Index website is built using React.js and Firebase. Users can compare a country's military using the option called compare countries.
- After that, I build some more projects using ReactJs and JavaScript.
- Projects are available on my personal website.
- Building a clone of the different websites helped me to get friendly with react.

## Projects

- Power Index:** It is a system that allows users to check for various countries' power depending on the countries' Army, Navy, and Air Force. Power Index App is built by using React.js and Firebase. <https://powerindex-cf70b.web.app/>
- Posting App:** This website is called Posting. We can post our thoughts and like and bookmark other posts Posting is built by using Tailwind.css, React.js, and Firebase. <https://posting-ps.netlify.app/>
- Covid Tracker:** The shows a total covid cases, recovered and deaths because of the coronavirus. CovidTracker is build using React.js, HTML, CSS. <https://covidtracker-ps.netlify.app/>
- Amazon Clone:** This website is an amazon clone. We can see the products listed on the website, add the product to the cart, choose the quantity of the product, and then we can proceed to checkout. <https://clone-aug10.netlify.app/>
- Todo App:** Todo-App is for organizing your work and differentiating between complete and incomplete work. Todo-App is built by using React.js and Firebase. <https://todo-5cdc9.web.app/>
- Portfolio Website:** <https://prathmeshshinde.netlify.app/>
