PROJECTS

Title: WMS-Portal `   Duration: March-2022: Feb-2023

Company: Shvintech India LLP, Hyderabad

Description:	The purpose of the Web Service Portal is to be able to speed up the process of setting up a new site and client in the WMS system. The User will enter the relevant information through different screens, until all the information required is completed. Once entered the data will be validated and finally inserted in the WMS schema so the setup of the site and client will be completed in WMS. The System Context work product initially represents the entire system as a single object or process.
Environment:	REST API in Java and Hibernate, JSF with Prime Faces
My Role:	Web Interface Development. Database Designing REST API Implementation with various use cases Testing and maintenance activity

Title: GTM   Duration: April-2021: Feb-2022

Company: VSN Information & Technology PVT LTD, Hyderabad

Description:	GTM (Global Tender Management) is a new proposed including automation tool. The main goal of the global Tender Management pricing tool is to support the functional activity surrounding tender management, removing manual tasks and replacing them with automated processes. Several functionalities exist in GTM such as loading CPS format into the system & match columns, checking & clean messy data, assigning station to original & destination
Environment:	REST APIs in Spring boot, Microservices, Hibernate, JPA, React JS
My Role:	Web Interface Development. Database Designing REST API Implementation with various use cases Testing and maintenance activity
